

## 32LHN48L

5902510609481

### HD picture quality

The unique characteristic of the Manta 32LHN48L TV set is its 32-inch screen. The LED technology and HD resolution used in this device ensures that the picture is clear and colours saturated. The picture quality is enhanced also by other advantageous parameters – a brightness of 200 cd/m<sup>2</sup> and a 3000:1 static contrast ratio.

### Watch movies and pictures using a USB connection

The USB port will allow for watching pictures or movies stored on external memory devices on a big screen. The TV set features also other ports – three HDMI ports, one VGA port and one component port. The last port makes it possible to connect also older consoles to the TV set – Manta 32LHN48L can become the home entertainment centre.

### State-of-the-art design

A distinguishing feature of the Manta 32LHN48L device is its light weight – only 3.8 kg. State-of-the-art design includes a thin frame and a stylish stand which makes it possible to put the TV set anywhere. To fix the device to the wall, it's enough to detach the stand.
