## ENTERTAINMENT CENTRE

When you connect a pen drive or a portable hard drive to the TV set through a built-in USB port, the user can access the multimedia content stored on the external drive. The TV set supports many popular film aspect ratios - also the FHD resolution - with Polish subtitles. There's plenty of possibilities of viewing on the TV screen pictures stored in a digital format, audio files can be also played. The television set makes it also possible to record programmes, saving data on a USB storage device connected to the TV. The unit can also easily display Teletext pages.

## CRYSTAL-CLEAR SOUND

Digital audio signal from TV stations and movies transmitted by a DVB-T decoder and an integrated AC3 system give an impression of surround sound emitted by built-in speakers. The TV set also receives sound in B/G, D/K, I systems.
